

3C Message Receive Device & Wireless USB High Power Transceiver

3C數位傳呼機 & 高功率無線雙向USB傳輸器

Model: **WS-MRDD**

WS-MRDD 3C message receive device is used the newest RF power save technology. It is very small and light also can let user type what they want and send whole message out without through calling base. Through WSUSBHPA1B41 Wireless USB High Power Transceiver, you can send whole messages to another one during receivable range; it is convenience and saving much time.

This product can show figures, English messages, called status, vibration and voice call to remind user. It is widely applications, such as factory, hospital, school and etc.

Battery is using LIR2025 which is very light and rechargeable, also easy to change battery. It is convenient to call for search and send message in time.

Feature

- ❑ Using newest RF digital technology design
- ❑ Don't need through call base and user can send message directly
- ❑ Largest power output of host can up to 2W (optional)
- ❑ Distance: 2KM(farthest)
- ❑ Smallest message receive device
- ❑ Short and thin
- ❑ Figures showing
- ❑ Vibration remind

Application

- ❑ Restaurant
- ❑ Hospital
- ❑ Bank and financial center
- ❑ Post
- ❑ Lands office
- ❑ Household registration office
- ❑ Tourist ticket center

Specification

- ❑ Frequency : 925~928MHz
- ❑ Distance: collocate with wireless USB transmitted high power, it can reach over 2KM(farthest)

Model: **WSUSBHPA1B41**

Feature

- ❑ Suitable for indoor and outdoor long-distance data transmission
- ❑ Light and convenience and fit for every kind of computers

Specification

- ❑ Frequency : 925~928MHz
- ❑ Interface: USB Port
- ❑ Output power: 0.5W (matching up to 2W)
- ❑ Distance: 1KM(2W matching up to more than 2KM)

Showing what you want easily!
